

Almost 1 in 5 look to different party in provincial election

Aug 16, 2011

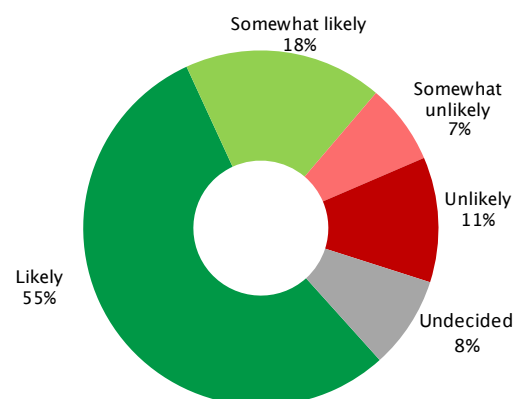

METHODOLOGY

Between August 10th and August 13th 2011, Nanos Research conducted a random telephone survey of 1,000 Ontarians 18 years and older. A random telephone survey of 1,000 Ontarians is accurate plus or minus 3.1 percentage points, 19 times out of 20.

Readers should note that the data was weighted for gender and age to match the Ontario census results. Results should be considered accurate of the Ontario population. Results may not add up to 100 due to rounding.

Any use of this research data should identify it as a "CTV/Globe/CP24/Nanos Poll".

QUESTION: Are you likely, somewhat likely, somewhat unlikely or unlikely to vote for a party provincially that you voted for in the recent federal election?
